DETAILED ACTION

1. This is response to the Amendment filed on August 31, 2004.

Allowable Subject Matter

2. Claims 2-3 and 6 are allowed and renumbered as 1-3.

Reason for allowance

3. The following is an examiner's statement of reasons for allowance: the present invention related to a display monitor having multiple operational modes. The monitor can have an operational mode being of a stand-alone functionality, as well as a mode wherein it serves as an output device. The closest prior art of Beeteson et al (U. S. Patent No. 5,877,745) shows a similar display monitor system which also having different operational modes. However, Beeteson fails to disclose

“circuitry for setting the monitor into the stand-alone operational mode or into further operational mode depending on the voltage at a connection between the monitor and a data processing system.” (claim 1) Or

a mode switching circuitry for detecting the monitor's connection state with the data processing system and determines whether the monitor should be in the stand-alone mode or the further operational mode depending on the connecting state.” (claim 6)

These distinct features have been added to independent claims and renders them allowable.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See Form PTO 892.
